

Plumping care with glycolic acid

If skin aging is genetically programmed, some other factors like environment, pollution or exposure to sunrays might make modifications to the skin structure.

Some soft remedying techniques exist which will scrub the skin while maintaining the natural hydrating agents to stimulate the production of elastine and collagen.

To perfect those techniques, the Ophyto® pH range and its glycolic acid peeling (AHA) offer an exceptional treatment for a spectacular beauty effect.

After completion of the treatment, the brightness of the complexion and the texture of the skin are visibly improved. Fine lines and pigmentary spots are reduced.

Renew your skin

Plumping care with glycolic acid for "him and her"

The Ophyto® pH treatment

At the beauty

The secret

The glycolic acid contained in the Ophyto® pH softly plumps the skin. It eliminates all dead cells and improves the synthesis of collagen and elastine.

Indications

For every man and woman as from 30 years to prevent skin aging signs and to keep a bright complexion. As a 1 month cure, at the rate of 1 treatment a week.

The results

Thanks to the Ophyto® pH treatment, the skin is purified in-depth, the cellular metabolism is reactivated, wrinkles and fine lines are reduced.

- **Dry skins:** improvement of the skin hydration.
- **Acne prone oily skins:** regulation of the sebaceous function.
- **Hyperpigmentary skins:** inhibition of the melanogenesis.

At home

1 Preparing pH Clean

Make-up remover milk enriched with glycolic acid for skin cleansing in-depth. *Do not use on eyes.*

2 Remineralizing pH Fresh

Remineralizing tonic gel with vital blue seaweed water for a firmer and brighter skin.

3 Optimizing pH Repair

Repair day cream for dry skins enriched with Ubiquinone Q₁₀ and allantoin for an intense hydration and an immediate comfort. May also be used as eye contour cream.

3 Optimizing pH Vitamin

Vitamin pre-aging day cream for normal and oily skins for an optimal protection against free radicals.

3 Optimizing pH White

Lightening day cream for pigmentary spots smoothing and complexion radiance.

4 Treating pH Purify

Anti-aging night cream for normal and oily skins enriched with glycolic acid and matifying agents for high hydration and regulation of the sebum production.

4 Treating pH Cream 20

Anti-aging night cream for dry skins enriched with glycolic acid and anti-irritant agent for an optimal comfort of the skin.
